"Silviculture Statistics" is compiled annually by the Timber Management Branch of the New Brunswick Department of Natural Resources. Its purpose is to inform Departmental Staff and interested agencies of silviculture activities. Detailed records on each project are maintained at the Forest Region Headquarters with duplicate copies filed at the Timber Management Branch. Prior to 1982 the Department of Natural Resources carried out all Silviculture Activities on Crown Land. Under the revised Crown Lands and Forests Act in 1982 this responsibility was transferred to Licensees.

In 1983, scarification was carried out on 8 595 hectares using C&H plows, shark-finned barrels, disc trencher, bracke, letourneau crusher and marden rollers. A total of 50 hectares were control burned.

The three provincial forest nurseries produced 21 million coniferous seedlings. Of this total 19.4 million were shipped for planting on 9 120 hectares of Crown Land and the remaining 1.6 million were shipped to private landowners for reforestation or for Christmas Tree Stock.

Experimental plantations have been included in the total area planted but the costs of these plantations have not.

Plantation tending was carried out on 488 hectares, and 2 460 hectares of naturally regenerated burns and cutovers were pre-commercially thinned. Herbicides were used to control undesirable deciduous species on 5 584 hectares and on an additional 292 hectares herbiciding was used for site preparation.

Fertilizer was applied to 121 hectares of plantation. This was carried out by the Department of Natural Resources.

The cone collection program accounted for 16 623 litres of cones.

The following statistics pertain to these silviculture activities on Crown Land in New Brunswick during the 1983-1984 year.

PROVINCIAL SUMMARIES

\+ Queens-Charlotte and Fundy have been grouped together because the information given about "trees shipped" has been listed by licensee, and Q-C and Fundy are both Irving and there is nothing to determine which is Q-C and which is Fundy.

° There were also 1 595 000 trees shipped for private orders that have not been included in the total.
